

### Layout Options

Diagonal . Perpendicular . Parallel

CrankCase™ Security Racks are best installed in a series where the bikes park *diagonally*. This allows convenient access to the locking area while allowing the racks to be most efficiently spaced. Alternatively, there is *perpendicular* parking. If this configuration is chosen please allow spacing between racks so that cyclists can easily access their locks. The *parallel* option is basically aligning the bikes end to end along a given wall, usually for walkway clearance.

(Please see layout graphics)

US Patent Number: 5,244,101

### Specifications

**Material:**

11 gauge stainless steel  
304 alloy

**Dimensions:**

Base 12.5"x10.5"  
Main Housing  
Length 10"  
Width 10"  
Height 13.5"  
Post 2"x2"x18"

**Weight:** 30lb.

**Hinge:**

Pin 1/4"  
Overall 1/2"  
2" Knuckle

**Security Chain:**

Thickness 3/8" sq.  
Link 2.25"x1.25"  
Length 42"  
Grade 80 Case Hardened  
Sleeve Black Cordura

**Mounting Holes:**

Quantity 4, Diameter 9/16"
