

CC01-LB-SS

Layout Options

Diagonal . Perpendicular . Parallel

CrankCase is best installed in a series where the bikes park *diagonally*. This allows convenient access to the locking area while allowing the racks to be most efficiently spaced.

Alternatively, there is *perpendicular* parking. If this configuration is chosen please allow spacing between racks so that cyclists can easily access their locks. The *parallel* option is chosen when aligning bikes end to end along a given wall, usually for walkway clearance.

(Please see layout graphics)

US Patent Number: 5,244,101

CrankCase w/ Lockbox Specifications

Material:

11 gauge stainless steel
304 alloy

Dimensions:

Base 15"x19"
Post 2"x2"x18"
Lockbox 9" x 15"

Weight: 60 lb.

Hinge:

Pin 1/4"
.120 wall thickness
2" Knuckle

Security Chain:

Thickness 3/8" sq.
Link 2.25"x1.25"
Length 42"
Grade 80 Case Hardened
Sleeve Black Cordura

Mounting Holes:

Quantity 5, Diameter 9/16"
